

Replacing coal with wind energy conserves 1.9 billion gallons of water and avoids 3.2 million metric tons of CO2 emissions in Nebraska each year.

Source: American Wind Energy Association

A young child wearing a blue and white life preserver and striped shorts stands on a sandy beach, holding a leash for a black dog. They are looking out at a large body of water with a forested shoreline in the background under a clear blue sky.

**Young Nebraskans deserve
a bright, clean future.**
